

## **First Structure Basic Requirements:**

1 – Must have the layers set as discussed in “Your First Structure Part 1”

2 – Must have units set to “Architectural” and “Inches”

3 – Structure must be a minimum of 1500 SqFt in space (Including exterior walls) \*this is just so you don't create a square shed and call it a day\*

4 – You must use a minimum of 4 blocks

5 – Make sure you give dimensions to your drawing and make sure the dimensions are legible and reasonable (Don't make them too big, but don't make them too small)
